Support

Key Information:

Established Provider of Engineering Services

-Trading since 1967

Proven Partner of Choice

-ABB Added Value Partner

-Bosch Rexroth Technology Partner

Accreditations

- UKAS Registered ISO 9001, ISO 14001 and awaiting newly awarded

45001 certificate

- NICEIC Approved Contractor

-Safecontractor Approved

-Certified Machinery Safety Experts

Growing & Evolving

-Traditionally an electrical engineering company but we've enhanced our offering with our new mechanical capabilities.

Our Aim:

Be **the** first choice **independent** supplier of Engineering Services & System Solutions to our specialist markets worldwide

Our Electrical Engineering Expertise:

- Automation experts – huge depth of knowledge regarding process lines.
- Design of hardware and software solutions to keep control systems up to date – electrically integrating new equipment into existing process lines and control methodologies.
- PLC, SCADA, HMI
- Drives Experts
- Full Turnkey Project Management
- Control Panel Design & Manufacture, MCC & LV Panels
- Process Knowledge—From years of automation experience across a huge breadth of industry
- Obsolescence Management, providing customers with low risk upgrade options, particularly in for obsolete GEM80 control equipment, Siemens S5 systems

Our Mechanical Engineering Services

- Bespoke Machinery Design
- Mechanical Integration of Production Machinery
- Pick and Place Production Equipment

Industries Served:

Automotive Manufacturing

Material Extraction and Processing

Industrial Manufacturing

Printing & Reprographic Industry

Food Production lines

Marine

Environmental Management

Defence

Environmental Disposal Plants
